

INSTALL

- Wordpress admin >> Plugins >> Add New >> Upload >> Browse >> Select options-framework.zip >> Install Now >> Active Plugin

via FTP: Open your FTP application and upload the unzipped “options-framework.zip” folder to “wp-content/plugins/”. Once uploaded, login to WordPress and go to Appearance > Plugin and click “Activate” on the Options Framework plugin.

- Wordpress admin >> Appearance >> Add New >> Upload Theme >> Browse >> Select nitteo.zip >> Install Now >> Active Theme

via FTP: Open your FTP application and upload the unzipped “nitteo.zip” folder to “wp-content/themes/”. Once uploaded, login to WordPress and go to Appearance > Themes and click “Activate” on the Nitteo theme.

- Wordpress admin >> Pages >> Add New >> Title "Main" >> Template select "Main Page" >> Publish
- Wordpress admin >> Pages >> Add New >> Title "Blog" >> Template select "Default Template" >> Publish
- Wordpress admin >> Settings >> Reading >> Front page displays: select "A static page" >> Front page select "Main" and Post page select "Blog" >> Save Change
- Wordpress admin >> Settings >> Permalinks >> select "Post name" >> Save Change
- Wordpress admin >> Settings >> Media >> Thumbnail size "205 x 205" (recommended) >> Save Change
- Wordpress admin >> Appearance >> Theme Options >> Edit Info >> Save Options
- Optional >> Import XML

IMPORT DEMO CONTENT (optional)

This step is optional, but highly recommended, as it will help you understand how all the parts of the theme play together. You can build upon the demo content or simply copy-and-paste what you need, and delete the demo files.

Wordpress admin >> Tools >> Import >> Click on “WordPress”. If you haven’t already installed the importer you will see a popup. Click on “Install Now”. After a few seconds the installation is done. Click on “Activate Plugin & Run Importer”.

To upload the demo content browse and select the demo XML file called “nitteo.wordpress.democontent.xml”. Click on “Upload File and Import”.

PORTFOLIO

Wordpress admin >> Pages >> Add New >> Title "Gallery" >> Template select "Gallery"

In the texteditor (Visual Mode) you'll find smiley icon.
If you want add images, use shortcut "image".

Example:

```
[img category="Illustration"]<a href="http://vxs.cz/wp_1/wp-content/uploads/2014/05/1x.jpg"></a>[/img]
```

If you want add video, use shortcut "video".

Example:

```
[vid category="Video" url="https://www.youtube.com/watch?v=KcrxRmggwAY"][/vid]
```

Tip: As hover headline use alt for pictures.
